

DIVERSA

Ultimate Dual-Function High-Speed Bundler and Case Packer

Maximum speed
up to 20 bundles/min

Maximum speed
up to 25 cas/min

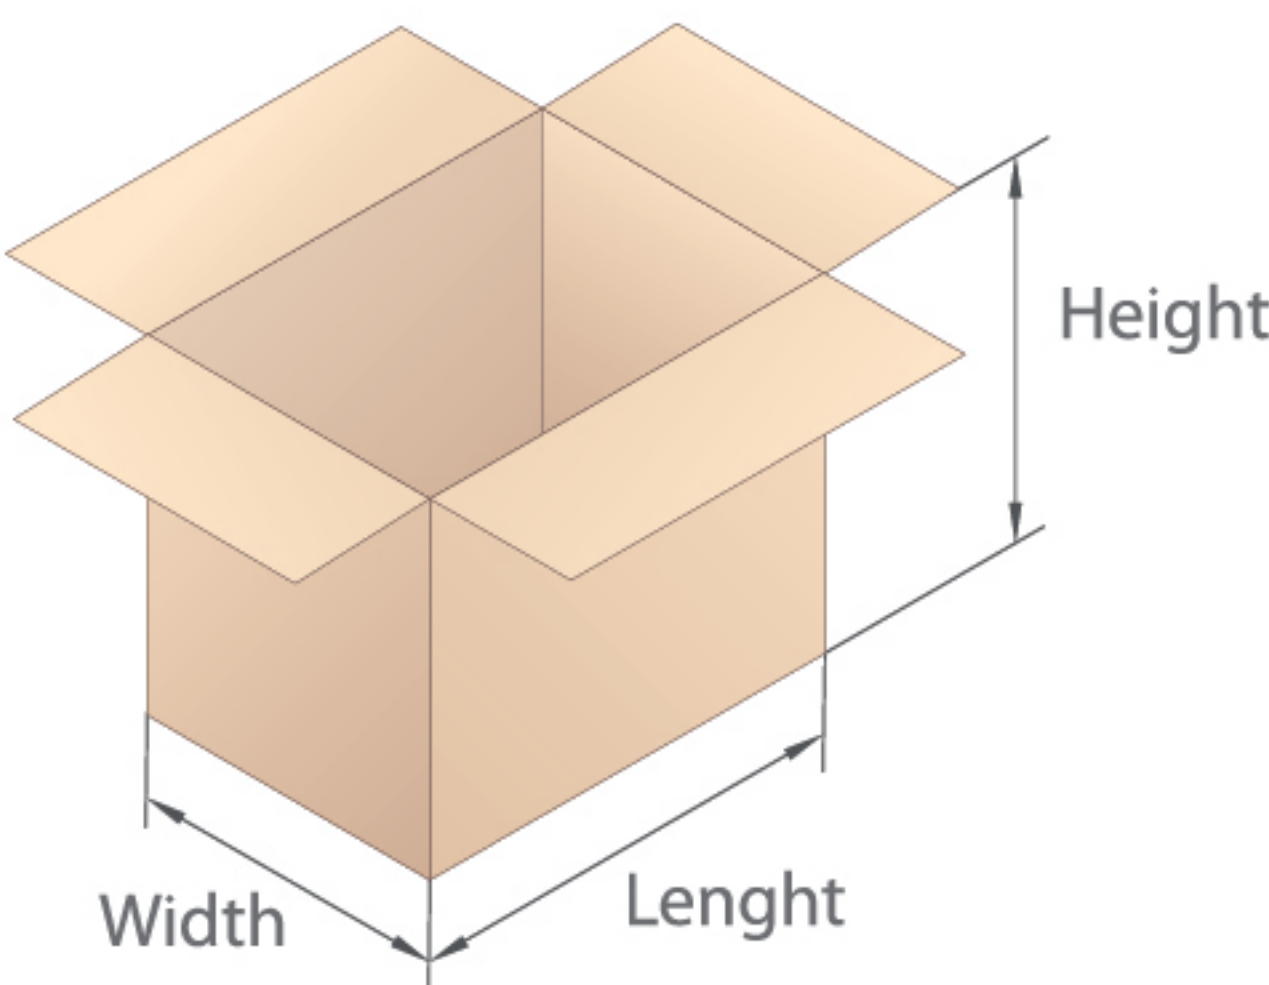

DIVERSA represents two machines merged into one - a high speed bundler and a completely distinctive case packer. Just a simple adjustment will turn your case packer into a bundler and vice versa. With DIVERSA, we managed to almost double the machine capacity with achieving speed more than 25 cases per minute. When it comes to bundling, DIVERSA can achieve the speed of more than 20 bundles per minute in real production which places it among the most superior bundlers on the market as well. Unlike some existing solutions on the market, DIVERSA doesn't require extra space and time for complex operations of switching the modules.

Characteristics

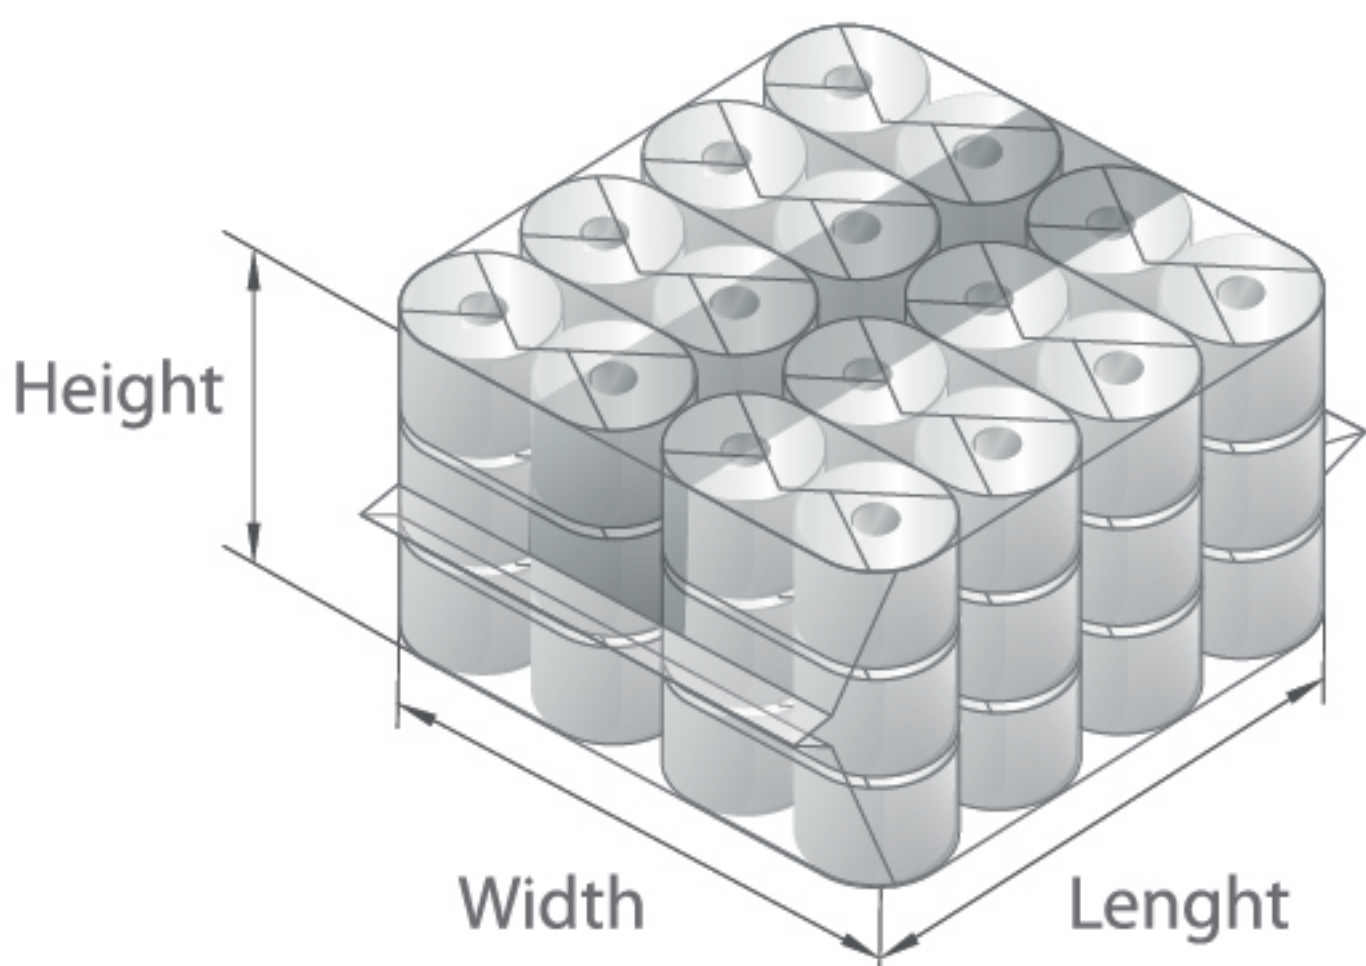

- Simple adjustment turns case packer into a bundler and vice versa
- Various infeed options (single arm, dual arm, launchers)
- Double elevator system
- Uppender module for KT
- Rotating elevator for AFH products
- Integrated hot melt case sealer
- Full size KDF stack loading
- High-speed Case packer and Bundler merged into one machine
