

MAESTRA

Ultimate Automatic Bag Filler
for Roll Products and Beyond

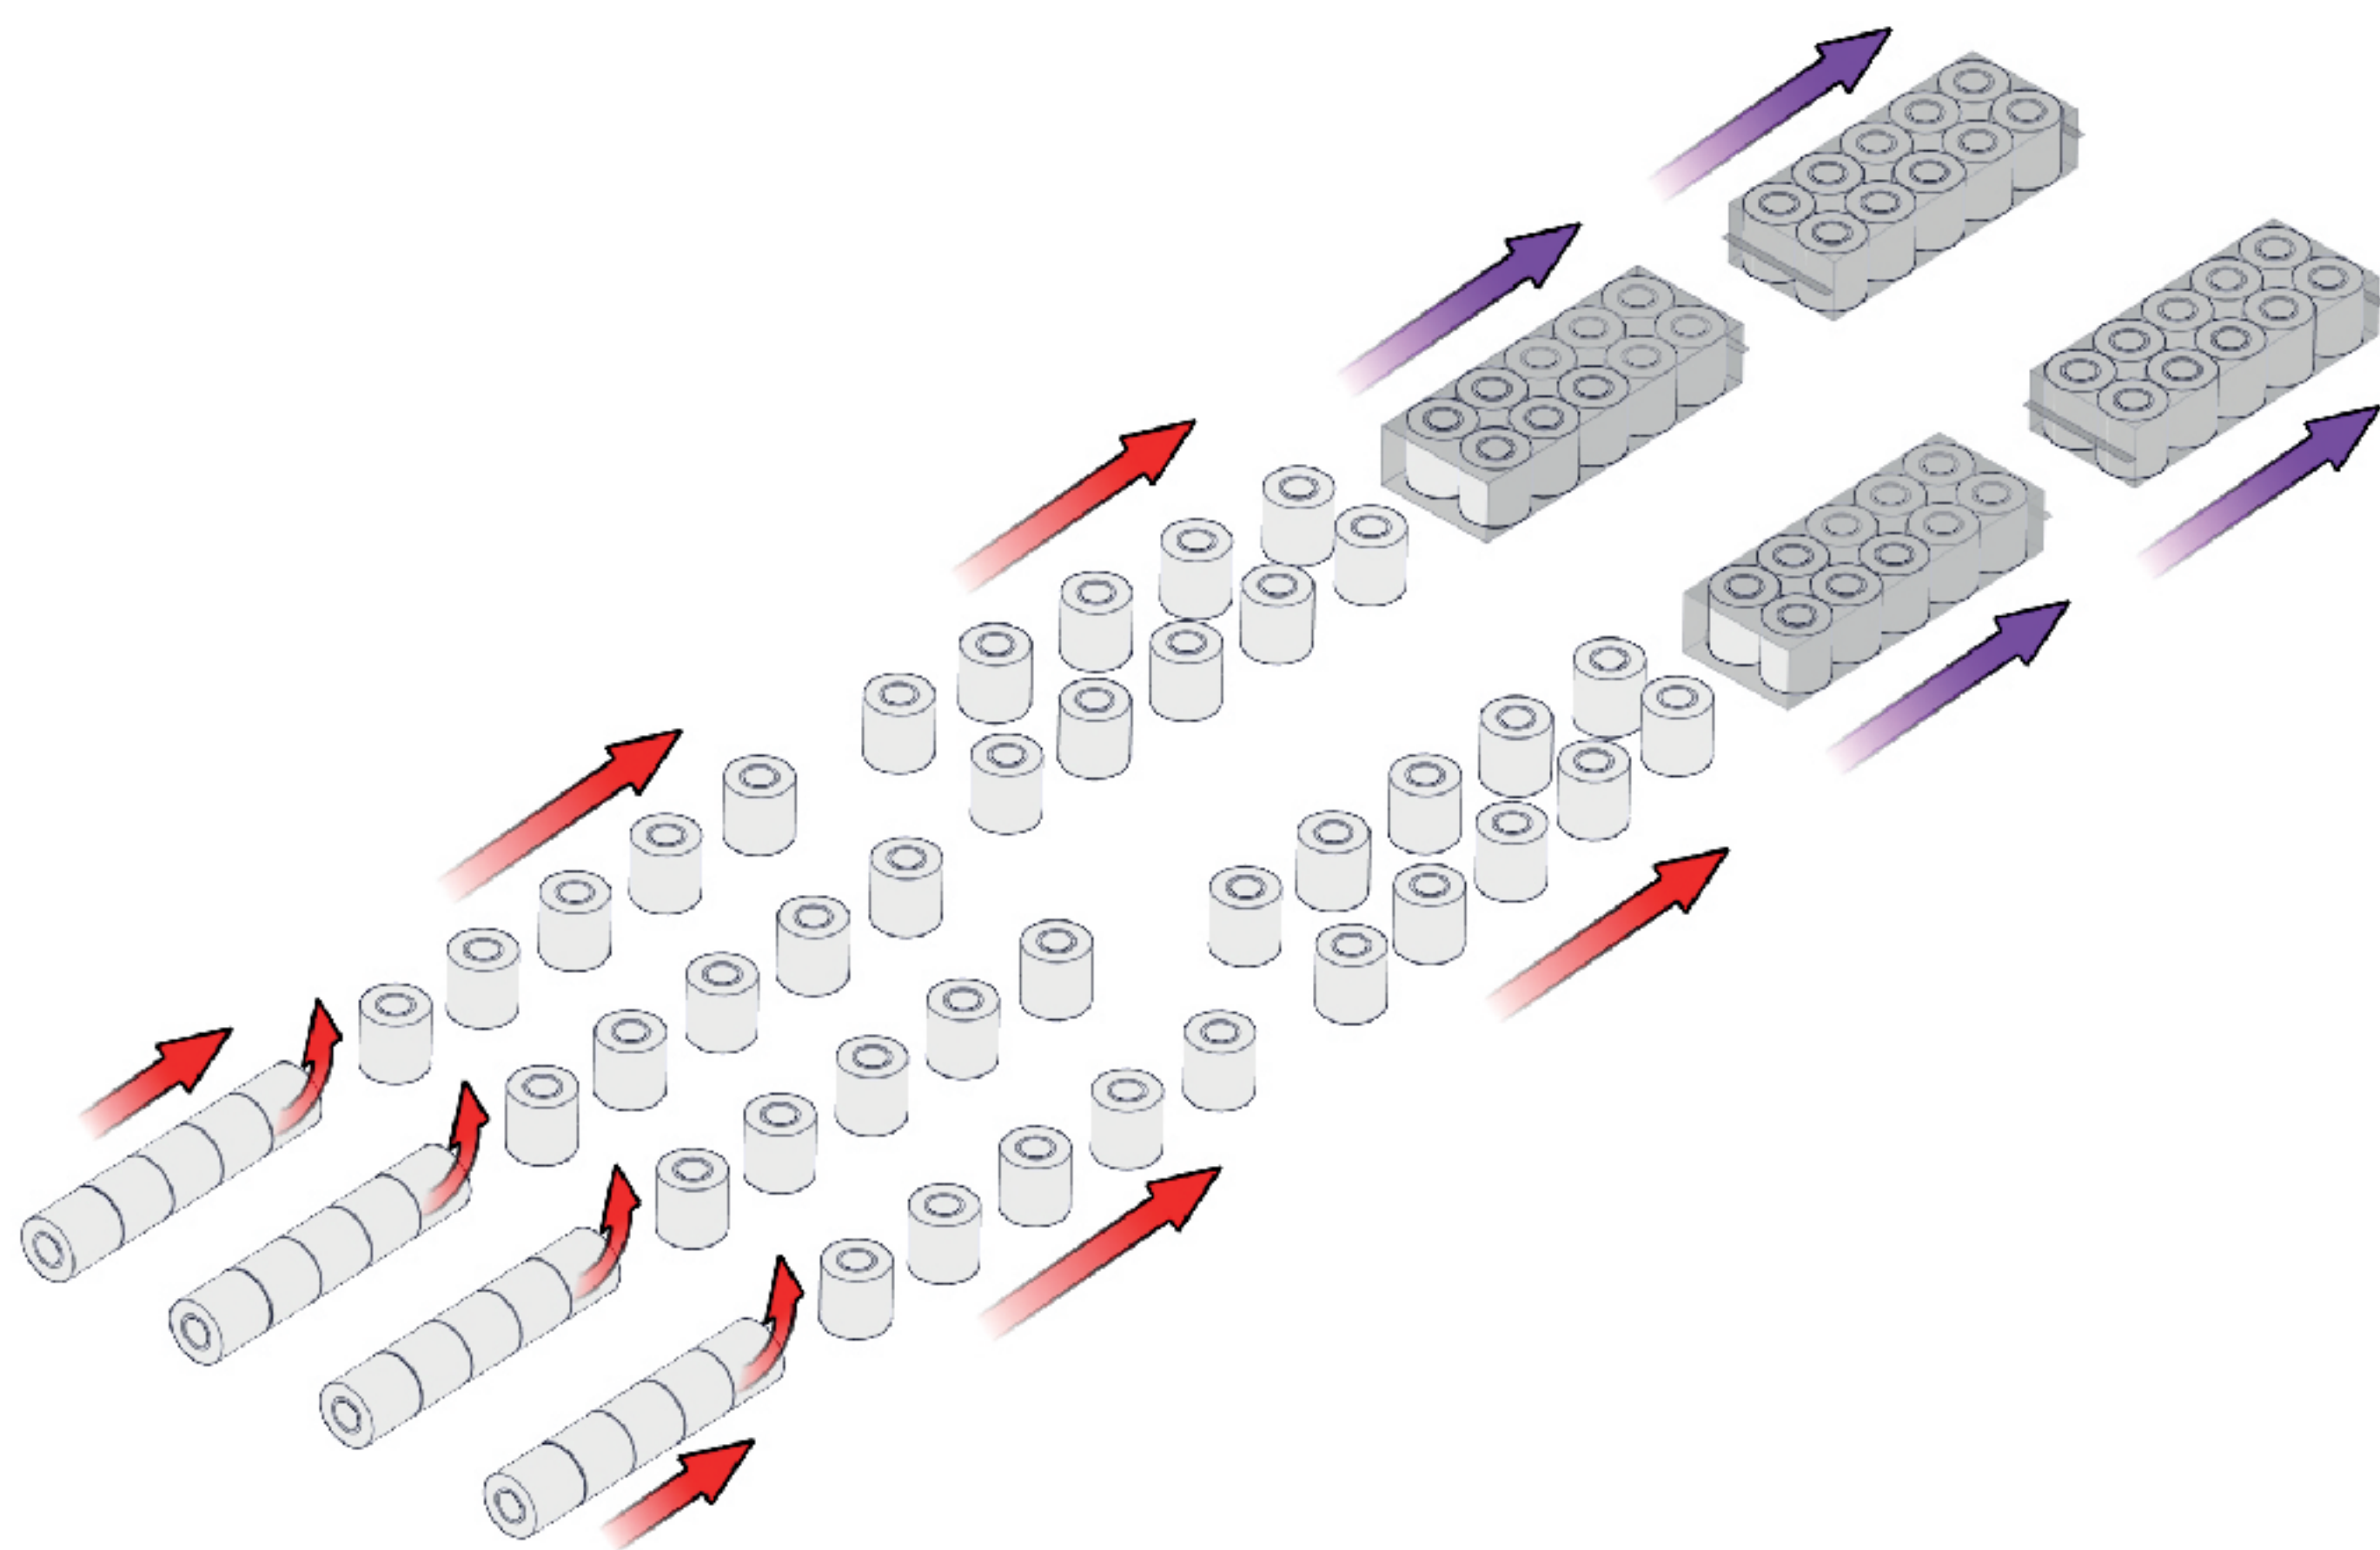

Maximum speed
up to 140 bpm

MAESTRA is a fully automatic bag filler primarily designed for packaging of different kinds of roll products into pre-made bags. It is designed to meet the most demanding customers’ needs reaching the highest performances and versatility. Impressive speed of 140 bags/min, wide range of roll diameters and cut-off options both for vertical and horizontal configurations and many other great features have positioned MAESTRA as the most competitive bag filler on the market. Furthermore, this system is easily adaptable for packaging of any other tissue or nonwoven products.
