

RCP-15

Superior Case Packer
for High-Speed Tissue Roll Packing

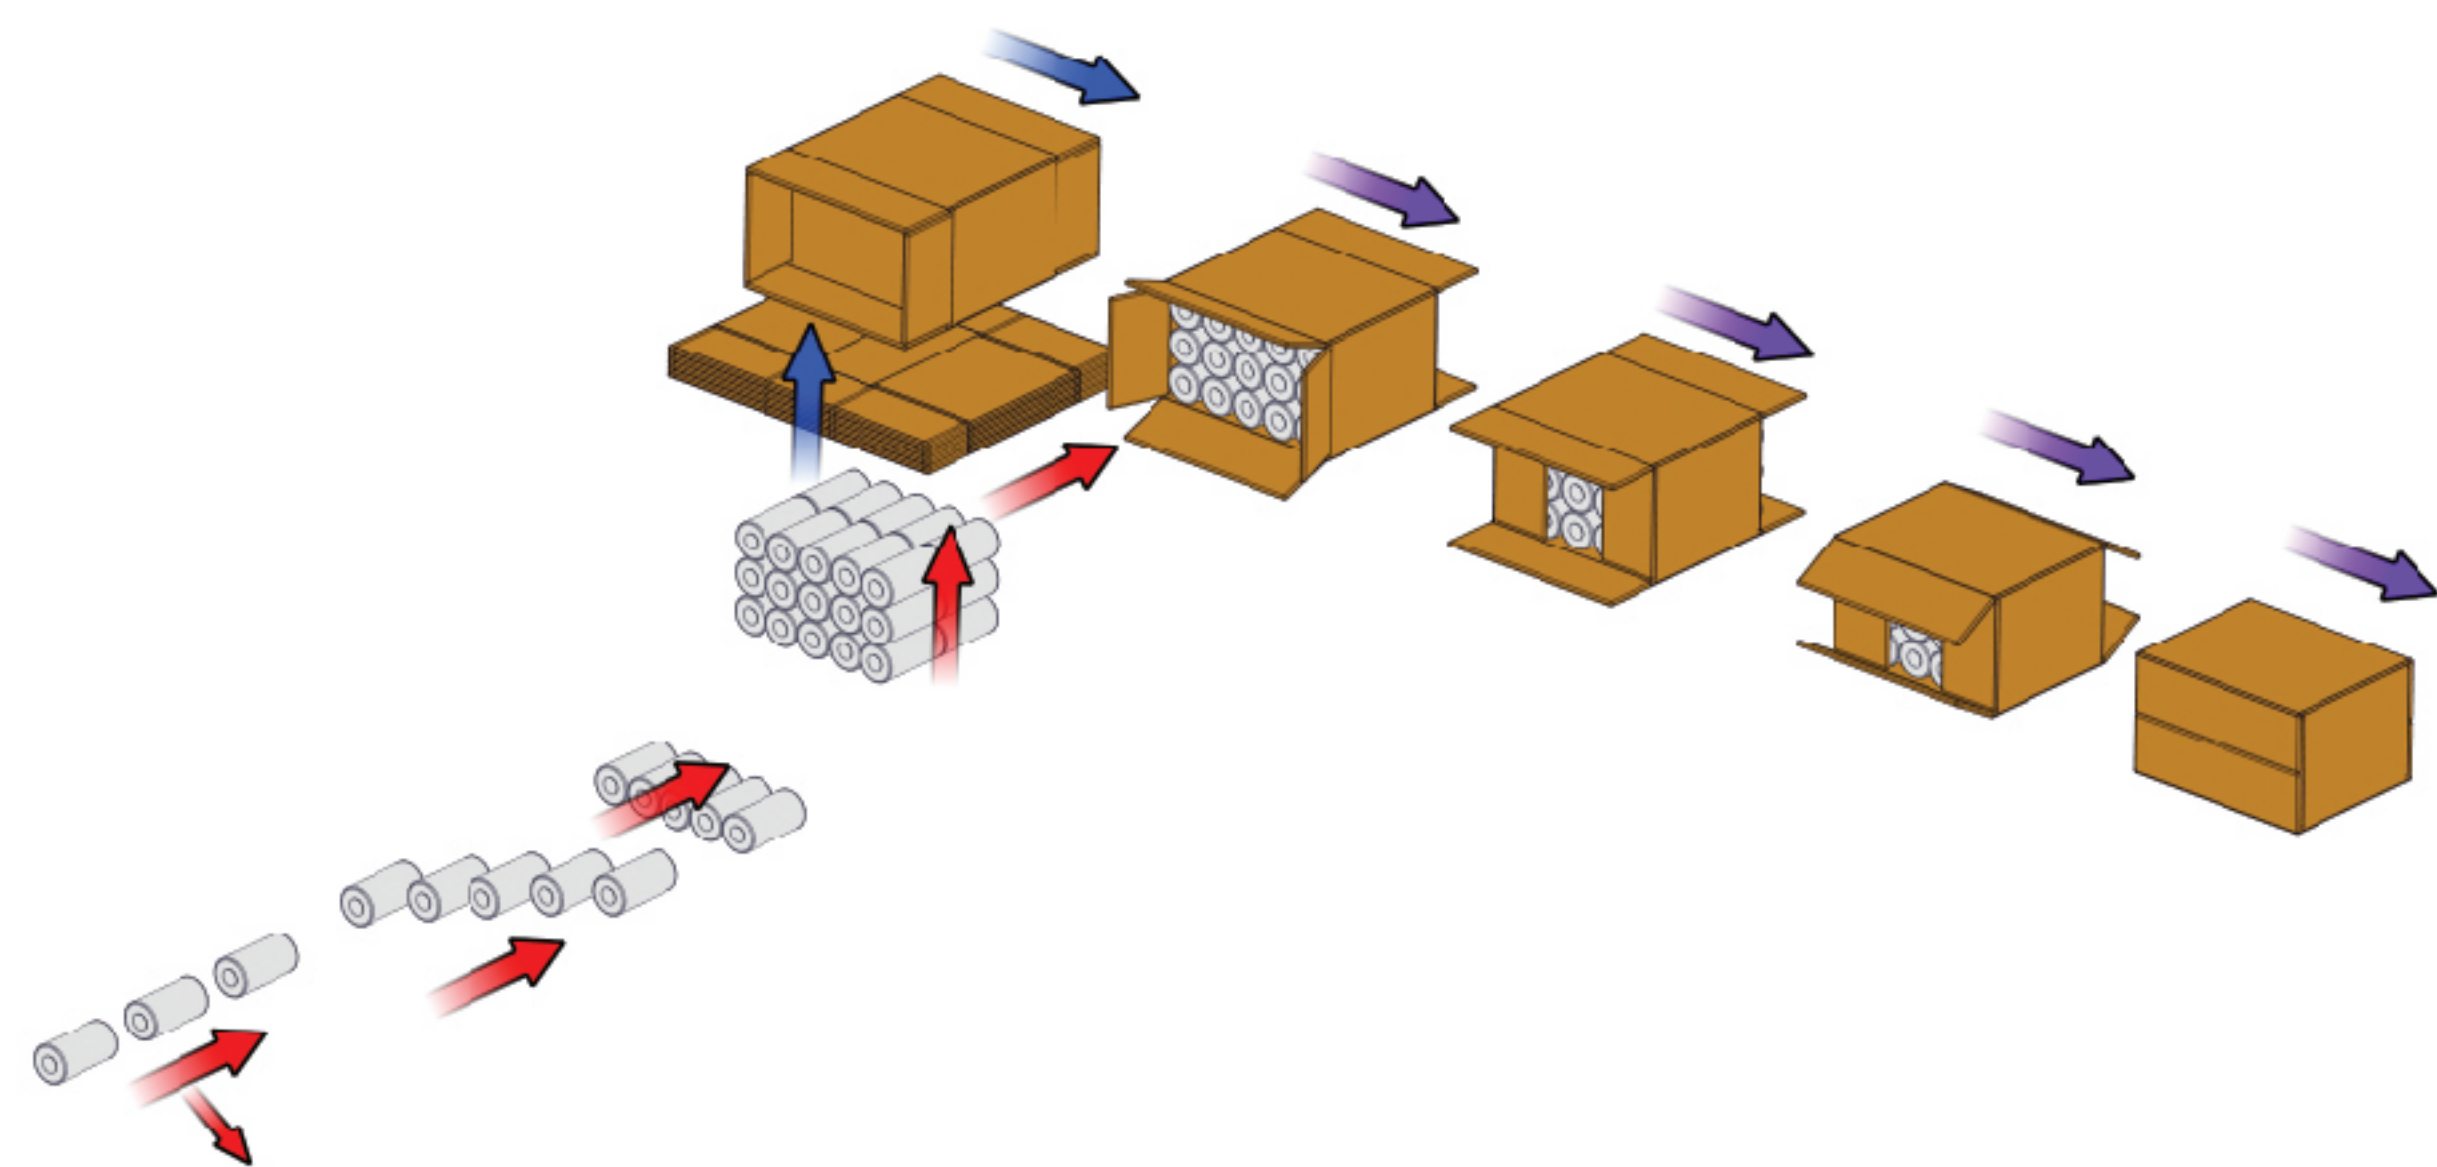

RCP-15 is our premium case packer, built on our collected extensive experience in casing products in tissue converting industry. It can pack different tissue roll packs in carton boxes in very wide range of pack configurations. As a result of its progressive infeed design, it reaches the speed of up to 15 box/min in single layer and over 12 in two and more layers configuration. Combined with the fact that its changeover time is averagely 10 min, this makes it most efficient case packer on the market.

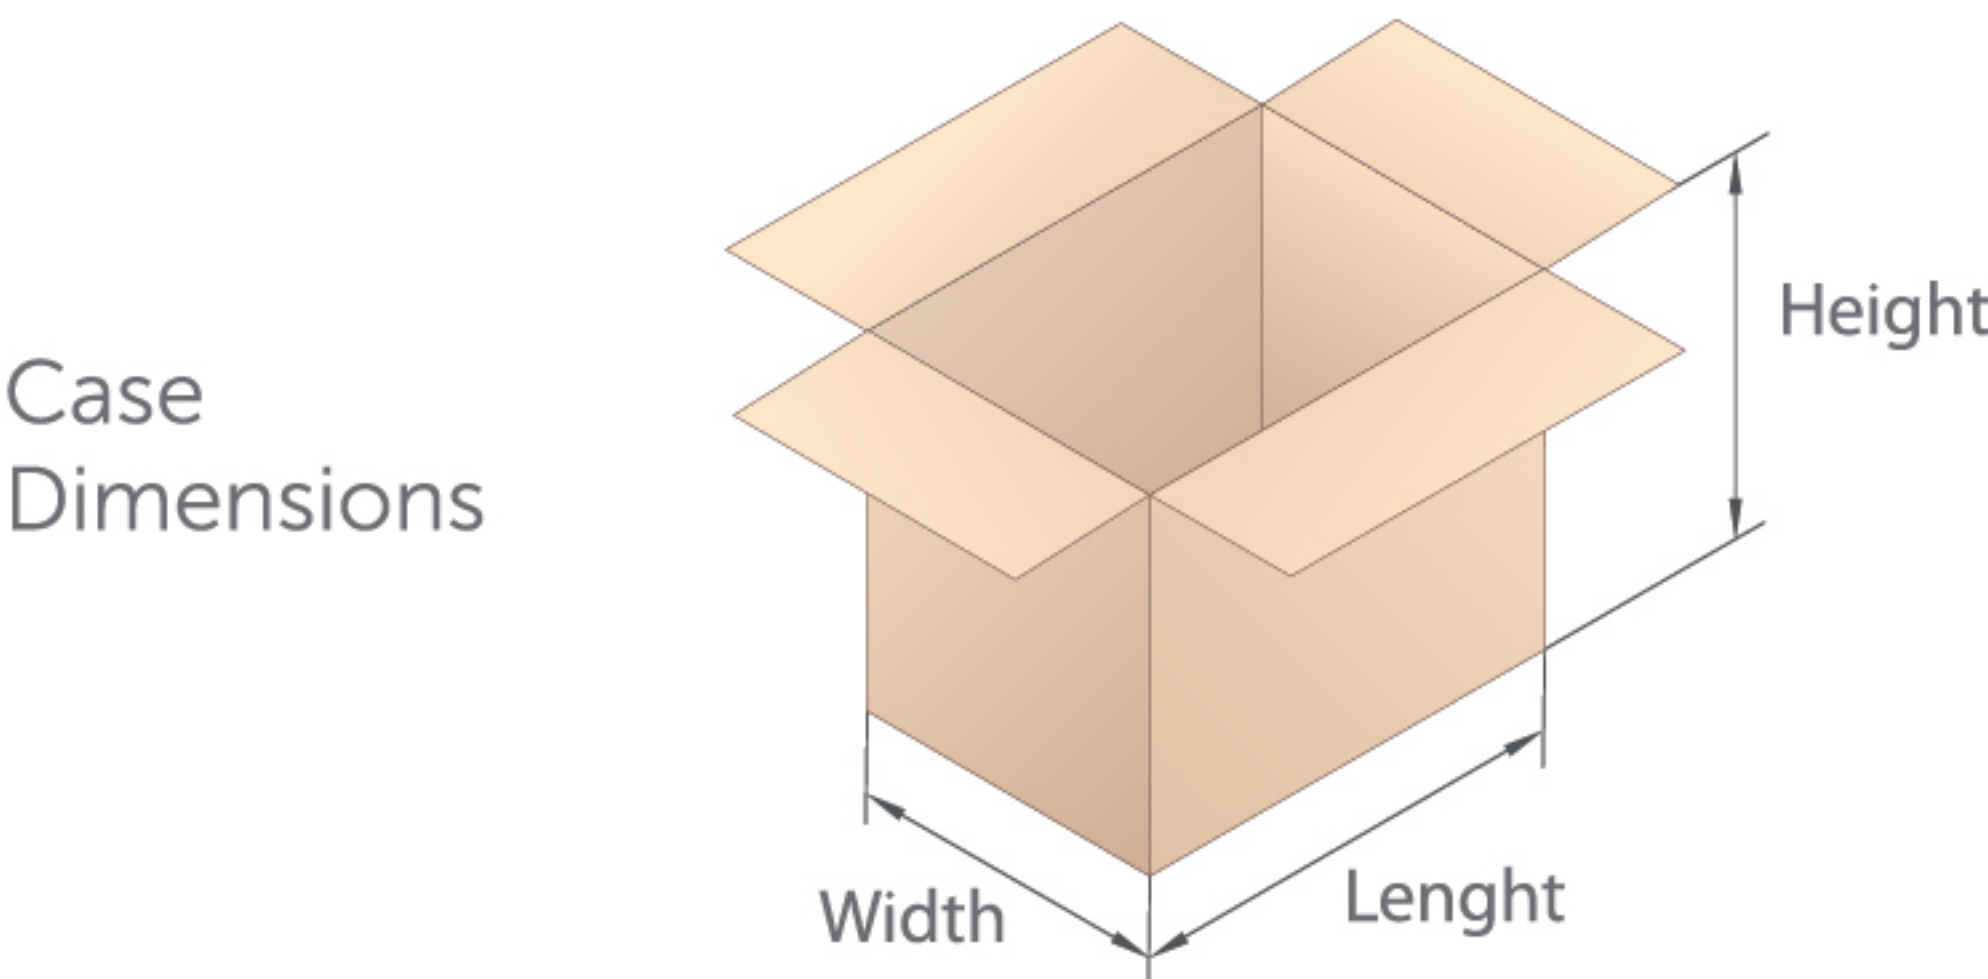

Characteristics

- Tape sealer and hot-melt case closing
- Various format options
- Side loading
- Compact footprint
- Various infeed options
