

VALIDA

The Premier High-Efficiency Wrapper
for Hygienic and Kitchen Rolls

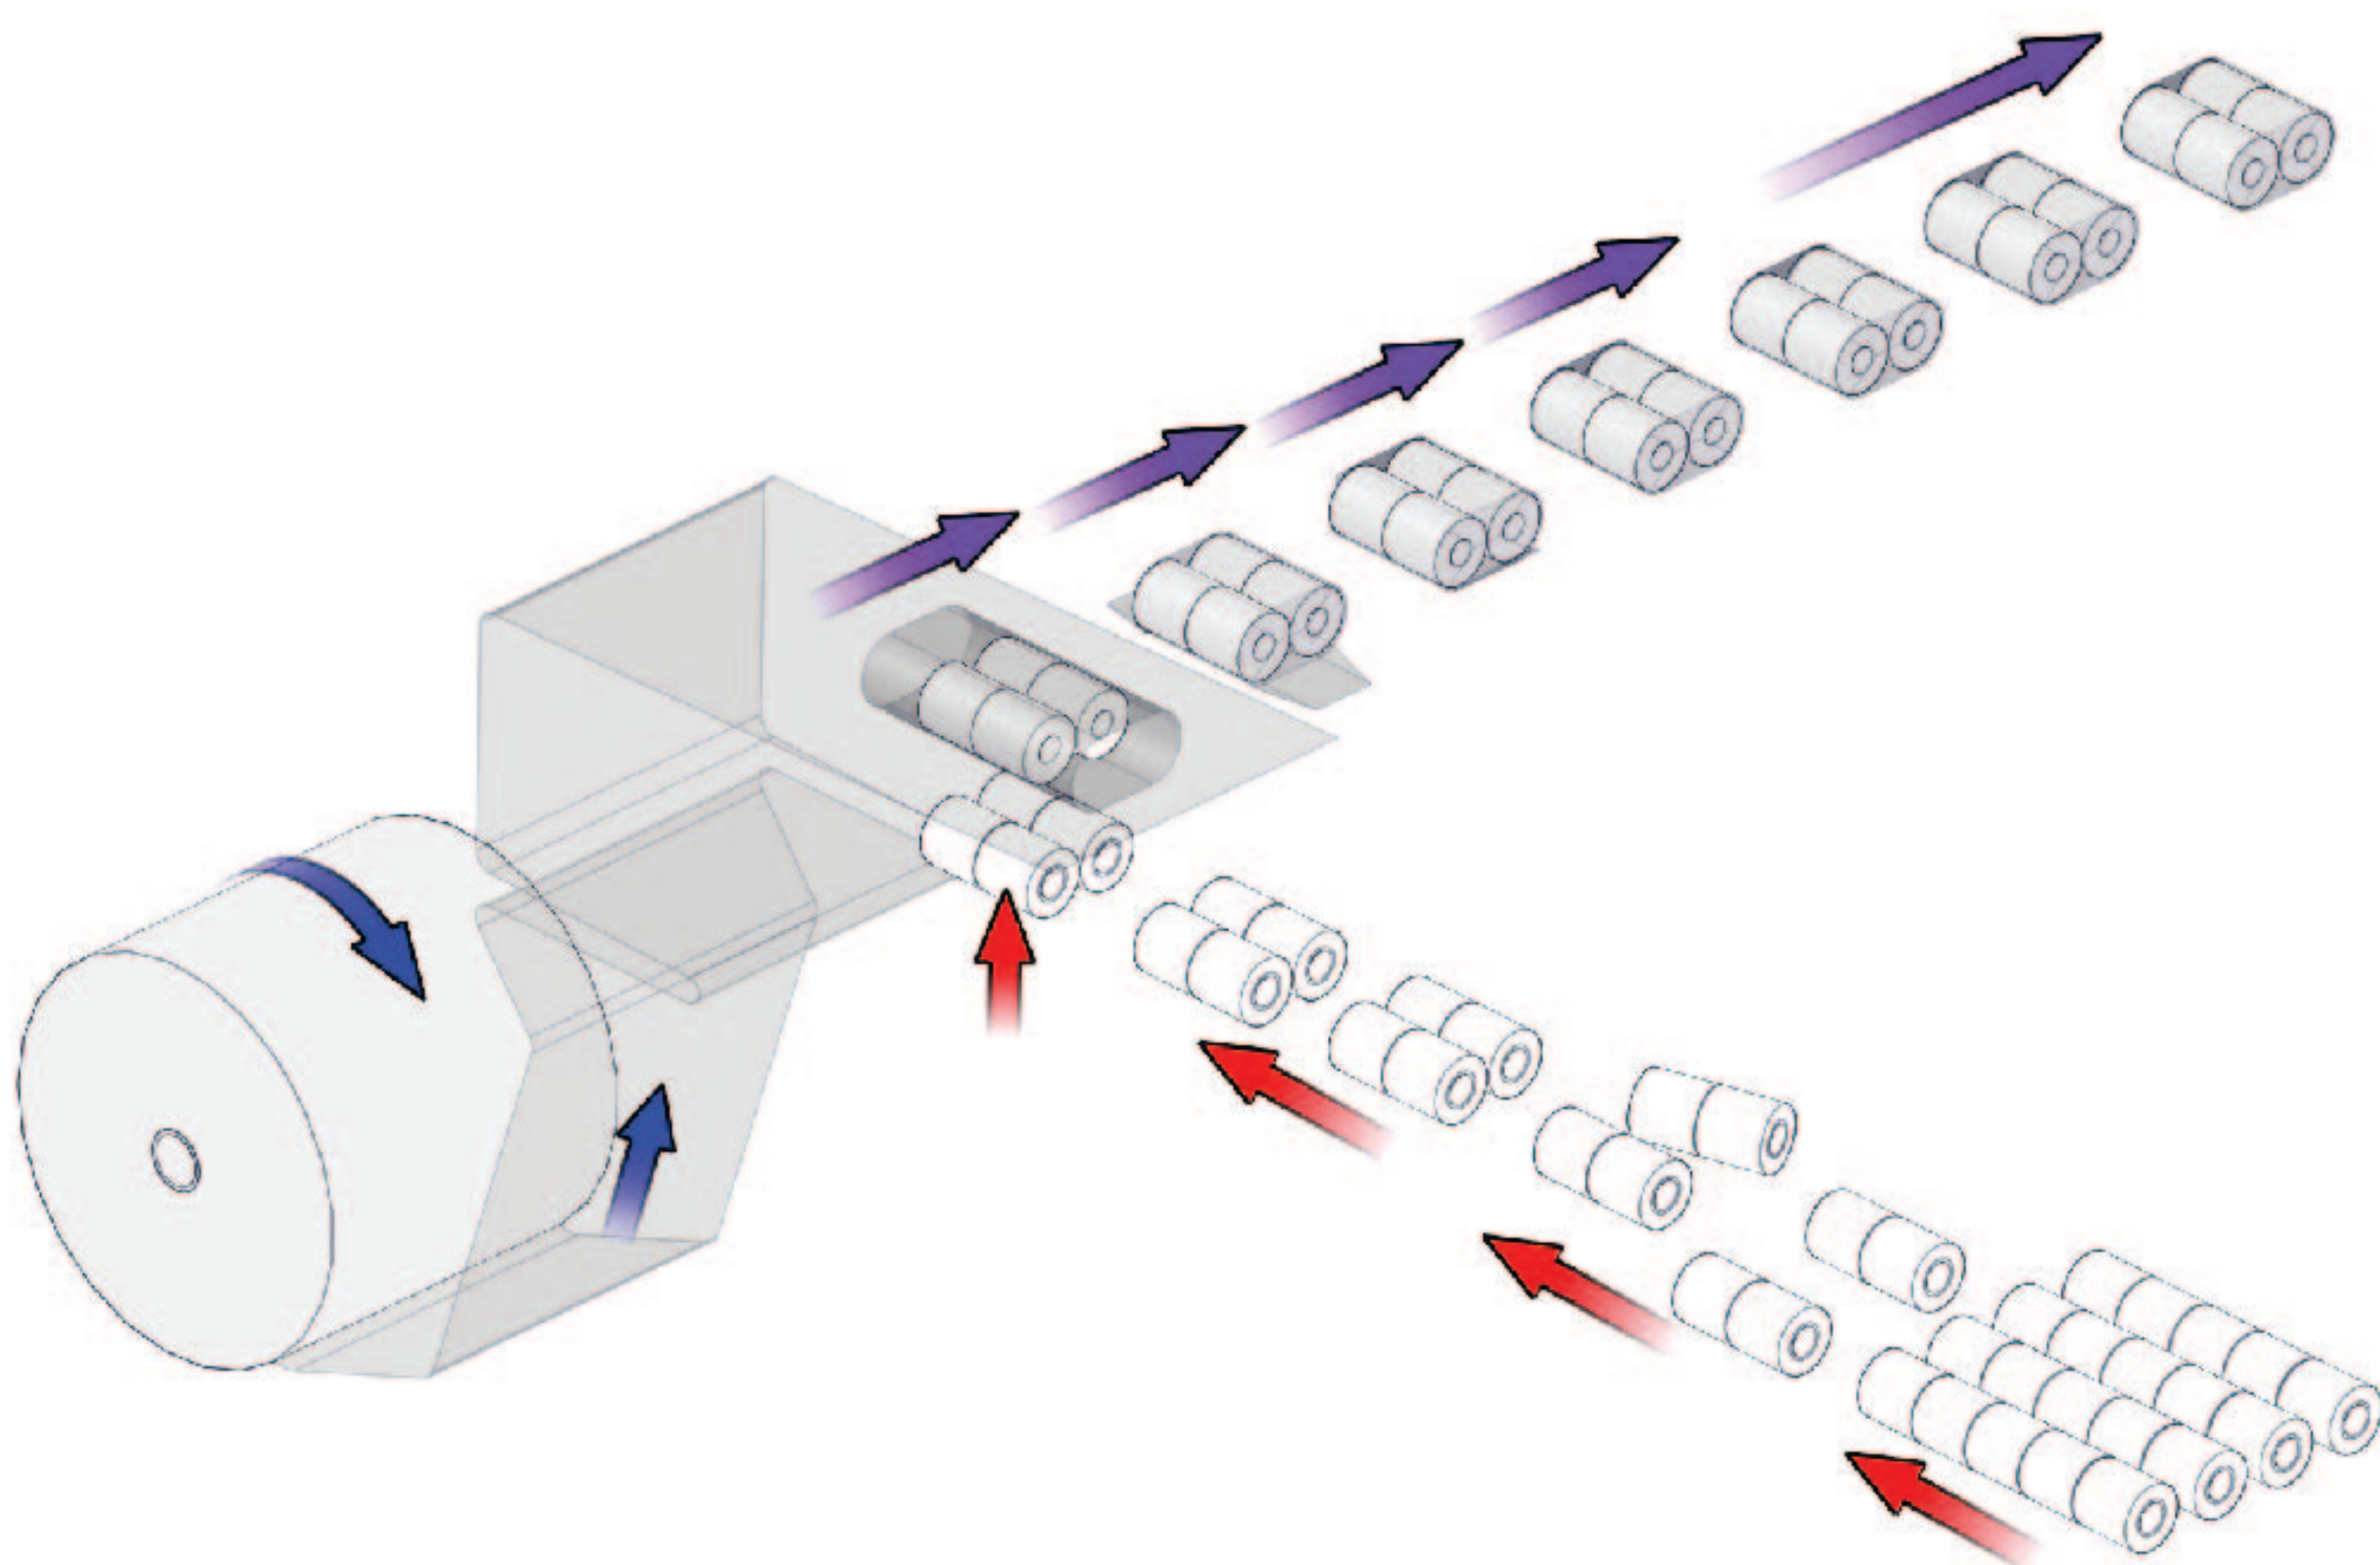

VALIDA wrapper is our premium packaging machine for hygienic and kitchen rolls. It is a robust wrapper designed for mass production of tissue rolls, for packs from a single roll up to 48 rolls on a single or double layer, with 4 (optionally 5) lanes infeed. This wrapper is easy to use, it is fully servo driven, entirely controlled by 24 servomotors and by the most advanced motion controllers which allow highest flexibility and extremely fast format changeover. With a production speed that exceeds 220 packs/minute and extremely easy maintenance, VALIDA places itself as the most advanced and at the same time the most efficient wrapper on the market.

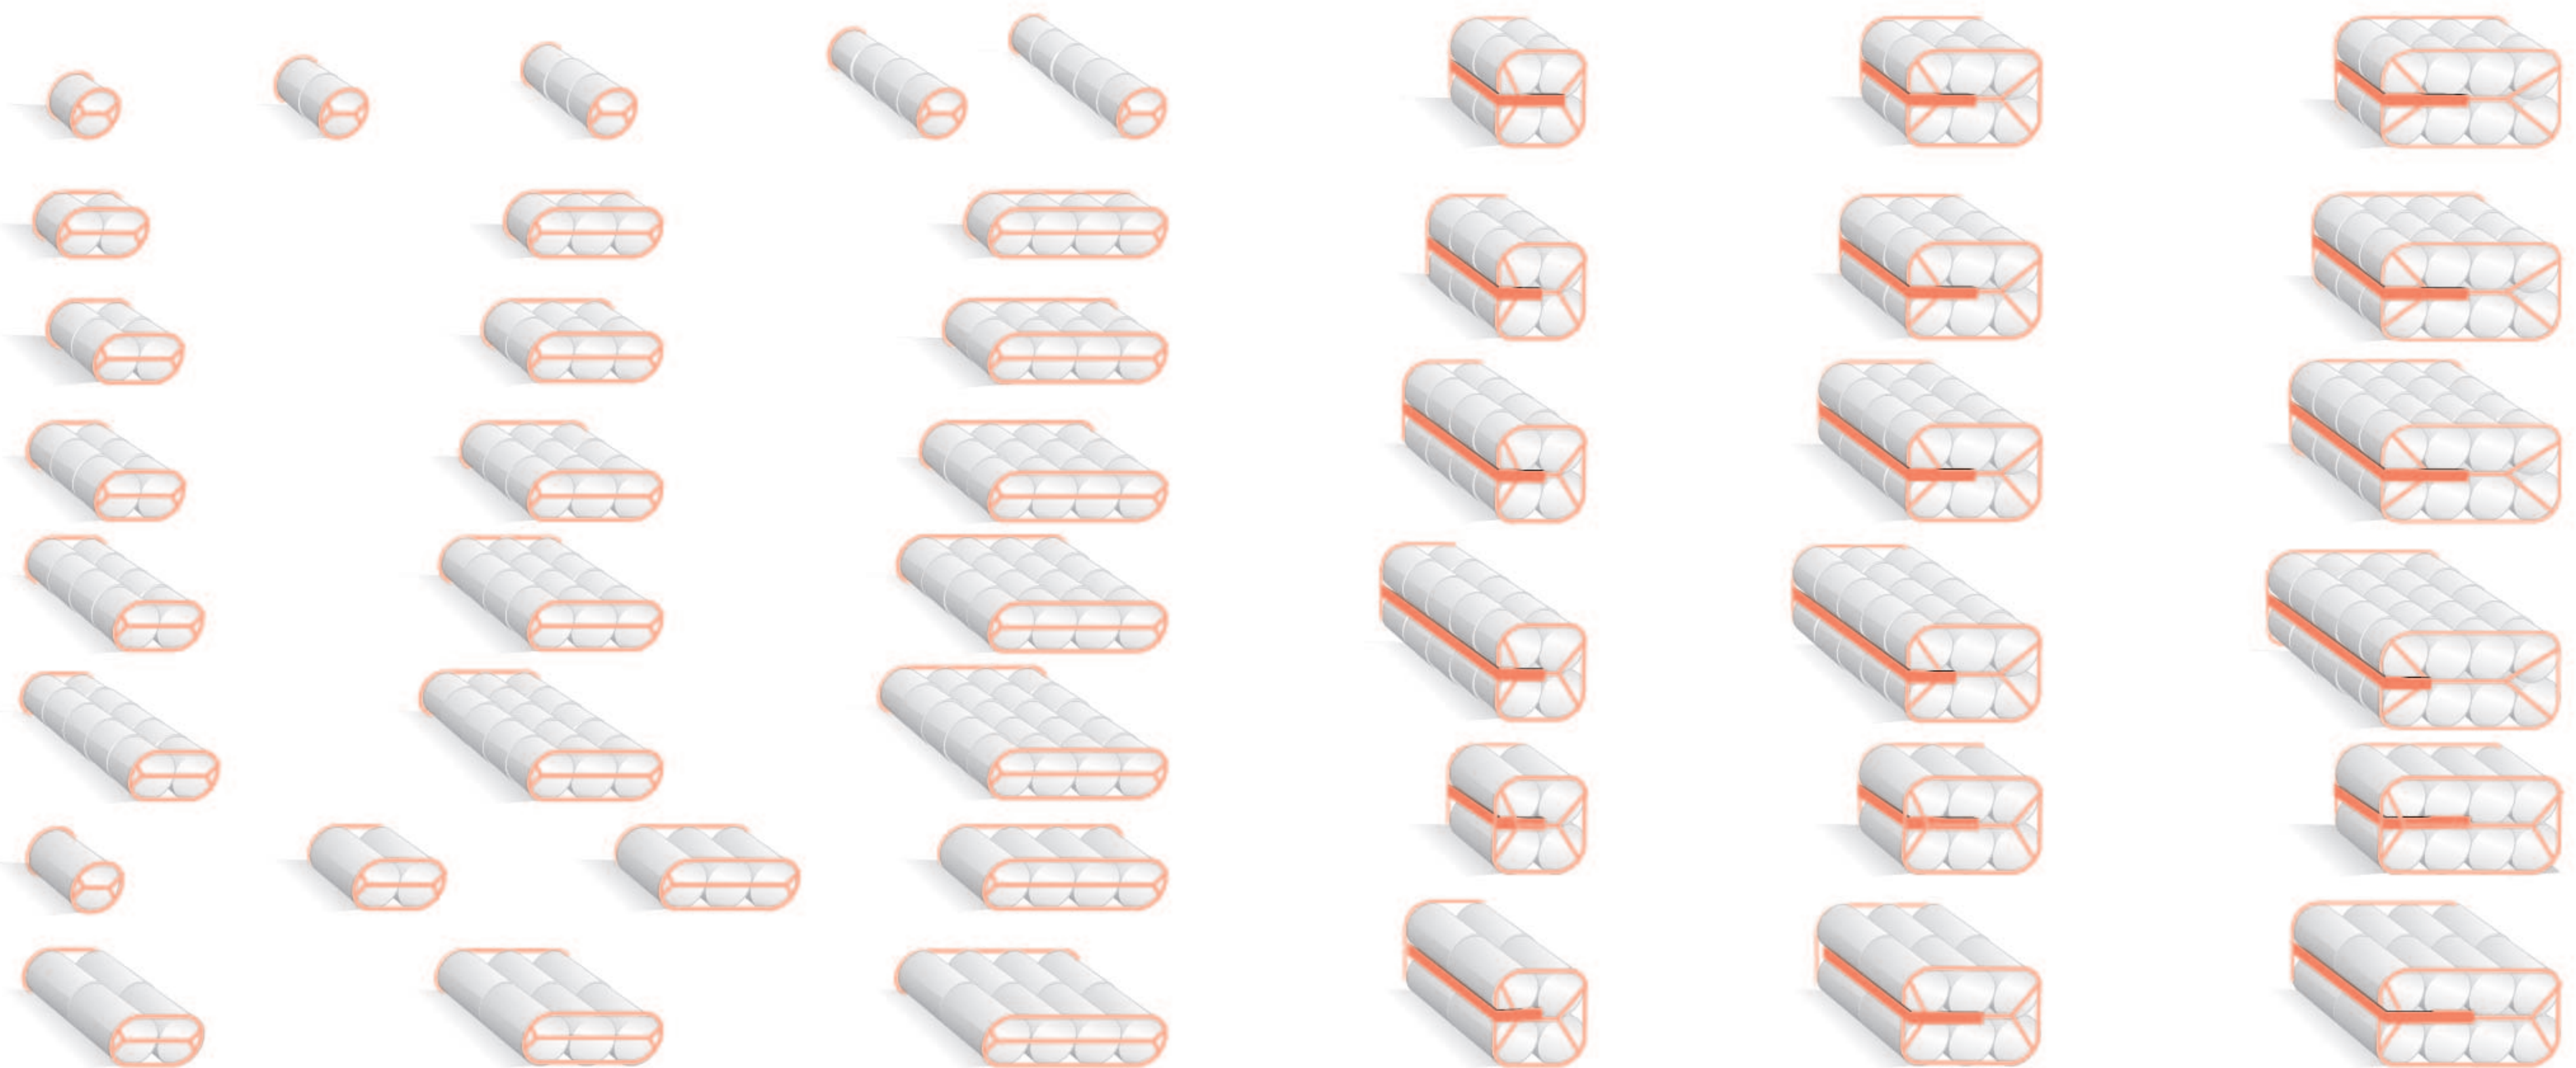

Characteristics

- Wide range of roll diameters and cut-off options
- Product continuous motion
- Innovative quick change overhead design
- Complete chain-free transmissions
- Quick change carbon bars
- Innovative launchers design
- First step bottom sealing
- Easy changeover
- Maintenance-Friendly Access
- Infeed 4/5 lanes
- From single up to 90 rolls in pack
- Roll diameter up to 250mm
- Hot melt paper wrapping option
- Lateral perforation for easy opening option
